

Physician Workforce in Nevada

2018 Edition

**Tabor Griswold, PhD, Anastasia Gunawan, MPH, and
John Packham, PhD**

June 2018

Acknowledgements

Physician Workforce in Nevada – 2018 Edition contains current, historical, and comparative data on the allopathic (MD) and osteopathic (DO) physician workforce in Nevada. The focus of this report is to improve health workforce planning and policy development in Nevada through the preparation and dissemination of the most current information on the physician workforce.

Methodology and Source

The report provides the most current data on the supply of physicians in Nevada and the United States. The report utilizes the most recent year (2015) of publicly available data on licensed health professional data collected by the American Medical Association (AMA) and available through the Health Resources and Services Administration's Area Health Resources File (AHRF). AHRF is accessible, and free of charge to the public. All AHRF data in this report was retrieved on February 2, 2018. For more information go to <https://datawarehouse.hrsa.gov/data/datadownload.aspx>.

An Appendix to this report provides a complete list of medical specialties and subspecialties utilized by the AMA.

Physician Workforce in Nevada – 2018 Edition

Summary of Findings

Physician Workforce in Nevada – 2018 Edition provides current data and trends on the physicians licensed in Nevada from 2005 to 2015. Unless otherwise noted, the “physician workforce” phrase refers to allopathic (MD) and osteopathic (DO) physicians licensed by the State of Nevada. The information contained in this report informs the health industry, educators, and state and local policymakers and other stakeholders about the reallocation of resources needed to meet state workforce development needs and to improve the health of all Nevadans.

Highlights and key findings of this section include:

- In 2015, there were 7,429 licensed physicians in Nevada or 257.0 physicians per 100,000 population of which 6,688 were licensed allopathic (MD) physicians or 231.4 MDs per 100,000 population and 741 were licensed osteopathic (DO) physicians or 25.6 DOs per 100,000 population (Table 1, Figure 1).
- In 2015, there were an estimated 7,137 non-federal physicians and 292 federal physicians in Nevada (Figure 1). There were 5,935 non-federal physicians (79.9%) actively practicing in patient care or involved in other professional activities (Table 1, Figure 1).
- The “balance of physicians” (1,257 or 16.9%) were actively licensed and inactive. Inactive is defined as retired, semi-retired, temporarily not in practice, or not active, and indicated they worked 20 hours or less a week. The majority of these physicians are MDs (1,206 or 95.9%) and DOs (51 or 4.1%) (Table 1, Figure 1).
- An estimated 5,935 non-federal physicians (79.9%) or 205.3 physicians per 100,000 population are the primary focus of this report. The non-federal designation was excluded from most of the table headings in this report (Table 1, Figure 1).
- The estimated 5,935 non-federal physicians were practicing full time in patient care or in non-patient care settings such as medical teaching, medical research, and administration or inactive (Table 1, Figure 1).
- In 2015, there were 5,284 licensed physicians in Southern Nevada (Clark, Lincoln, Nye, and Esmeralda Counties); 2,061 in Northeastern Nevada (Elko, Eureka, Lander, and White Pine Counties); and 84 in Northwestern Nevada (Carson City, Churchill, Douglas, Humboldt, Lyon, Mineral, Pershing, Storey, and Washoe County). There were 4,367 or 82.6% active and not classified in Southern Nevada. There were 1,736 or 84.2% active physicians in Northwestern Nevada and 69 or 82.1% active physicians in Northeastern Nevada (Table 2).

Figure 1: Physician Workforce in Nevada – 2015

- There were 5,563 or 192.4 physicians per 100,000 population in Nevada across four major categories: 753 or 26.0 physicians per 100,000 population in general practice; 2,001 or 69.6 physicians per 100,000 population in medical specialties; 1,021 or 35.3 physicians per 100,000 population in surgical specialties; and 1,778 or 61.5 physicians per 100,000 population in other specialties (Tables 2 and 3).
- In Southern Nevada, the total number of physicians per 100,000 population decreased from 228.2 licensed physicians per 100,000 population to 196.5 active licensed physicians per 100,000 population, as 13.9% are licensed and inactive physicians (Table 3).
- In Northwestern Nevada, the total licensed physicians (257.3 per 100,000 population) reduced to 246.1 per 100,000 population with only 4.4% licensed and inactive physicians. In Northeastern Nevada, the total licensed physicians (95.3 per 100,000 population) reduced less than one physician per 100,000 population (94.8) as only 0.5% are licensed and inactive physicians (Table 3).
- From 2005 to 2015, the number of licensed physicians by self-designated specialties in Nevada increased from 4,570 to 5,563 active physicians; 685 to 1,257 inactive physicians; and 385 to 609 not classified physicians. Percentage increases were 21.7% for active physicians, 83.5% for inactive physicians, and 58.2% for not classified physicians (Table 4 and Table 5).
- Even though the increase of 1,789 total physicians over ten years is a 31.7% growth, population growth moderated by effect. The change in physicians per 100,000 population decreased the overall impact of this growth to 10.0%. The number of active physicians per 100,000 population increased from 189.2 to 192.4 an increase of just 3.2 physicians per 100,000 population or 1.7% for ten years. There was a growth 53.3% of inactive physicians or 15.1 per 100,000 population (Table 5).
- The number of additional physicians needed to reach the national average or median per 100,000 population is 2,561 physicians. The estimated numbers by specialty area are 289 in general practice; 1,038 in medical specialties; 540 in surgical specialties; and 694 in other specialties (Table 6).
- There were 5,408 licensed physicians or 72.8% of the physician workforce in Nevada working in patient care – 3,812 in Southern Nevada, 1,533 in Northwestern Nevada, and 63 in Northeastern Nevada. Over 80% of physicians working in patient care were employed in office based setting across all region – 84.6% in Southern Nevada, 81.6% in Northwestern Nevada, 93.7% in Northeastern Nevada (Table 7).
- From 2010 to 2015, the number of physicians and advance practice clinicians in the primary care workforce increased in all categories in Southern Nevada. The number of pediatricians per 100,000 population declined in Northwestern and Northeastern Nevada (Table 8).
- From 2010 to 2015, in primary care, the number of physicians per 100,000 population increased for both family medicine and internal medicine, but not pediatrics in Nevada. Meanwhile, the number of advanced practice clinicians increased by 76.4% for advanced practice registered nurse and 40.3% for physician assistant in Nevada (Table 9).
- In 2015, the mean age of allopathic physicians (MDs) in Nevada was 52.7 years old. A number of specialties have more than 10.0% of actively working physicians aged 65 and older, including general practice, allergy/immunology, thoracic surgery, forensic pathology, occupational medicine, and general preventive medicine (Table 10).

- The average age of active licensed physicians in Nevada ranges from 43.3 years old (family medicine subspecialties) to 69.2 years old (general practice) (Table 11).
- In 2015, the average age of allopathic physicians (MD) was 52.7 years old, slightly younger than osteopathic physicians (DO) in Nevada which is 54.9 years old. Allopathic physicians (MD) in Northeastern Nevada were much older in comparison to Nevada and the U.S. (Table 11).
- The physician workforce was much younger in Nevada compared to the U.S. for the following specialties: general pediatrics, colon/rectal surgery, obstetrics/gynecology, plastic surgery, child & adolescent psychiatry, nuclear medicine, occupational medicine, psychiatry, and public health (Table 11).
- In general, the number of physicians per 100,000 population in Nevada ranked in the bottom five states of the U.S. regardless of the specialty. However, Nevada ranks 7th in the country for working physicians with an international medical degree and 32nd in the U.S. for physicians aged 60 and older (Table 12).
- Nevada ranked 19th in students matriculating from a medical school in their home state of Nevada. Nevada ranked third for residents and fellows with an international medical degree in an ACGME-Accredited Program (Table 12).
- Nevada is ranked 8th in the U.S. for keeping physicians retained from Graduate Medical Education and 9th for physicians retained from Undergraduate Medical Education and Graduate Medical Education (Table 12).
- Among the U.S. states, Nevada ranks 47th for active physicians per 100,000 population, 200.1 versus 371.6 for the U.S. (Table 12).
- Among the U.S. states, Nevada ranks 48th for active primary care physicians per 100,000 population, 62.8 versus 82.5 for the U.S. (Table 12).
- In 2017, Nevada ranked 29th among U.S. states with 34.6% of physicians graduating from undergraduate medical education remaining active in Nevada (Table 12).
- In 2017, Nevada ranked eighth among U.S. states with 54.0% of physicians completing residencies and fellowships report that they will remain active in Nevada (Table 12).
- In 2017, Nevada ranked ninth among U.S. states with 76.7% of physicians completing undergraduate medical education and graduate medical education report that they will remain active in Nevada (Table 12).

Undergraduate Medical Education			
Total Student Enrollment per 100,000 Population	33	28.1	35.4
Total Student Enrollment in Public Schools per 100,000 Population	38	38.0	17.9
Percentage Change in Student Enrollment, 2006-2016	14	53.5%	32.8%
Percentage of Students Matriculating to a MD-Granting Institution in State of Their Legal Residence, in Academic Year 2016-2017	19	69.4%	60.7%
Graduate Medical Education			
Residents and Fellows on Duty as of December 31, 2016 in ACGME-Accredited Programs per 100,000 Population	46	15.5	37.8
Residents and Fellows on Duty as of December 31, 2016 in ACGME-Accredited Primary Care Programs per 100,000 Population	40	9.0	13.9
Ratio of Graduate Medical Education (GME) to Undergraduate Medical Education (UME), Academic Year 2015-2016	41	0.6	1.1
Residents and Fellows on Duty as of December 31, 2016 in ACGME-Accredited Programs with International Medical Degree, Percentage	3	43.3%	24.4%
Change in Number of Residents and Fellows in ACGME-Accredited Programs, 2006-2016, Percentage	3	82.0%	14.5%
Percentage Retention from Undergraduate and Graduate Medical Education Programs			
Physicians Retained from Undergraduate Medical Education (UME) and are Active in State	29	34.6%	38.5%
Physicians Retained from Public Undergraduate Medical Education (UME) and are Active in State	31	38.8%	46.6%
Physicians Retained from Graduate Medical Education (GME) and are Active in State	8	54.0%	47.5%
Physicians Retained from Undergraduate Medical Education and Graduate Medical Education and are Active in State	9	76.7%	67.1%

Practice Specialties**

Allergy & Immunology (AI)

Allergy (A)
Allergy & Immunology/Clinical & Laboratory Immunology (ALI)
Immunology (IG)

Aerospace Medicine (AM)**Anesthesiology (AN)**

Adult Cardiothoracic Anesthesiology (ACA)
Pain Medicine (Anesthesiology) (APM)
Critical Care (Anesthesiology) (CCA)
Hospice and Palliative Medicine (Anesthesiology) (HPA)
Obstetric Anesthesiology (Anesthesiology) (OAN)
Pain Management (PME)

Cardiovascular Disease (CD)**Child & Adolescent Psychiatry (CHP)****Colon & Rectal Surgery (CRS)**

Proctology (PRO)

Dermatology (D)

Clinical & Laboratory Dermatological Immunology (DDL)
Procedural Dermatology (PRD)

Diagnostic Radiology (DR)

Cardiothoracic Radiology (CTR)

Emergency Medicine (EM)

Critical Care Medicine (Emergency Medicine) (CCE)
Emergency Medical Services (EMS)
Sports Medicine (Emergency Medicine) (ESM)
Medical Toxicology (Emergency Medicine) (ETX)
Hospice and Palliative Medicine (Emergency Medicine) (HPE)
Pediatric Emergency Medicine (Emergency Medicine) (PE)
Urgent Care Medicine (UCM)
Undersea Medicine (Emergency Medicine) (UME)

Forensic Pathology (FOP)**Family Medicine (FM)**

Adolescent Medicine for Family Practice (AMF)
Family Medicine/Preventive Medicine (FMP)
Geriatric Medicine (Family Medicine) (FPG)
Sports Medicine (Family Medicine) (FSM)
Hospice and Palliative Medicine (Family Medicine) (HPF)

Gastroenterology (GE)**General Practice (GP)****General Preventive Medicine (GPM)**

Clinical Informatics (Preventive Medicine) (CIM)
Medical Toxicology (Preventive Medicine) (PTX)
Undersea Medicine (Preventive Medicine) (UM)

General Surgery (GS)

Abdominal Surgery (AS)
Complex General Surgical Oncology (Surgery) (ASO)
Surgical Critical Care (Surgery) (CCS)
Craniofacial Surgery (CFS)
Dermatologic Surgery (DS)
Head & Neck Surgery (HNS)
Hand Surgery (HS)
Hospice and Palliative Medicine (Surgery) (HPS)
Hand Surgery (Surgery) (HSS)
Oral & Maxillofacial Surgery (OMF)
Pediatric Cardiothoracic Surgery (PCS)
Pediatric Surgery (Surgery) (PDS)
Surgical Oncology (SO)
Trauma Surgery (TRS)
Vascular Surgery (VS)

Internal Medicine (IM)

Advanced Heart Failure & Transplant Cardiology
(Internal Medicine) (AHF)
Adolescent Medicine (AMI)

Critical Care Medicine (Internal Medicine) (CCM)
Diabetes (DIA)
Endocrinology, Diabetes & Metabolism (END)
Hematology (Internal Medicine) (HEM)
Hepatology (HEP)
Hepatology/Oncology (HO)
Hospitalist (HOS)
Hospice and Palliative Medicine (Internal Medicine) (HPI)
Interventional Cardiology (IC)
Cardiac Electrophysiology (ICE)
Infectious Diseases (ID)
Clinical & Laboratory Immunology (Internal Medicine) (ILI)
Geriatric Medicine (IMG)
Sports Medicine (Internal Medicine) (ISM)
Nuclear Cardiology (NC)
Nephrology (NEP)
Nutrition (NTR)
Medical Oncology (ON)
Rheumatology (RHU)
Sleep Medicine (Internal Medicine) (SMI)
Transplant Hepatology (Internal Medicine) (THP)

Medical Genetics (MG)

Clinical Biochemical Genetics (CBG)
Clinical Cytogenetics (CCG)
Clinical Genetics (CG)
Clinical Molecular Genetics (CMG)
Medical Biochemical Genetics (MBG)
Molecular Genetics Pathology (Medical Genetics) (MGG)

Neurology (N)

Child Neurology (CHN)
Clinical Neurophysiology (CN)
Endovascular Surgical Neuroradiology (Neurology) (ENR)
Epilepsy (Neurology) (EPL)
Hospice and Palliative Medicine (Psychiatry & Neurology) (HPN)
Pain Medicine (Neurology) (PMN)
Sleep Medicine (Psychiatry & Neurology) (SMN)
Vascular Neurology (VN)

Nuclear Medicine (NM)**Neurological Surgery (NS)**

Endovascular Surgical Neuroradiology (ES)
Endovascular Surgical Neuroradiology (ESN)
Pediatric Surgery (Neurology) (NSP)

Obstetrics & Gynecology (OBG)

Female Pelvic Medicine & Reconstructive Surgery (Obstetrics &
Gynecology) (FPR)
Gynecological Oncology (GO)
Gynecology (GYN)
Hospice & Palliative Medicine (Obstetrics & Gynecology) (HPO)
Maternal & Fetal Medicine (MFM)
Obstetrics (OBS)
Critical Care Medicine (Obstetrics & Gynecology) (OCC)
Reproductive Endocrinologist (REN)

Occupational Medicine (OM)**Ophthalmology (OPH)**

Ophthalmic Plastic and Reconstructive Surgery (OPR)
Pediatric Ophthalmology (PO)

Orthopedic Surgery (ORS)

Hand Surgery (Orthopedic Surgery) (HSO)
Adult Reconstructive Orthopedics (OAR)
Orthopedics, Foot & Ankle (OFA)
Osteopathic Manipulative Medicine (OMM)
Musculoskeletal Oncology (OMO)
Pediatric Orthopedics (PO)
Sports Medicine (Orthopedic Surgery) (OSM)
Orthopedic Surgery of the Spine (OSS)
Orthopedic Trauma (OTR)

Other Specialty (OS)

Addiction Medicine (ADM)
